Abstract: In this research, actual water tariff was investigated for drinking water and sanitation sector, the survey for water tariff was conducted for 16 municipalities in Gaza strip. As a result of this study, there is 16 different water tariff applied in similar social and economic conditions for the people served by these municipalities. In other words, there is no unified tariff system followed by the mentioned municipalities. The study focus on the necessity of development of new water tariff system taking into consideration all social, economical aspects for the Palestinian people in Gaza strip to be followed by all municipalities.
