The study of using managerial accounting methods in the industrial companies in Gaza province "fieldwork study"

- - -
// //

:

:

Abstract: This study aims to clarify the application of managerial accounting methods in the industrial companies in Gaza province and the scope of using it. The researcher made a fieldwork study through a questionnaire distributed to the concerned employees. The result of this study was the refusal of the first, third, and the fourth hypothesis of the research and the acceptance of the second hypothesis Because the result of study showing that the using of managerial accounting methods by the industrial companies in Gaza Province was weak and the scope of using it. The study recommended the encouragement of developing the ability to use the application of the Managerial accounting methods and its role to prepare the suitable information that support Managers to plan, control, the evaluation of performance and decisions Making.
